GCSE Mathematics (1MA1) - Foundation Tier Paper 1F
October 2016 mock paper mark scheme

## NOTES ON MARKING PRINCIPLES

## Guidance on the use of codes within this mark scheme

M1 - method mark. This mark is generally given for an appropriate method in the context of the question. This mark is given for showing your working and may be awarded even if working is incorrect.

P1 - process mark. This mark is generally given for setting up an appropriate process to find a solution in the context of the question.

A1 - accuracy mark. This mark is generally given for a correct answer following correct working.

B1 - working mark. This mark is usually given when working and the answer cannot easily be separated.

C1 - communication mark. This mark is given for explaining your answer or giving a conclusion in context supported by your working.

In some cases full marks can be given for a question or part of questions where no working is seen. However, it is wise to show working for one small slip could lead to all marks being lost if no working is shown.

Some questions (such as QWC) require all working to be shown; in such questions, no marks will be given for an answer with no working (even if it is a correct answer).

Note that in some cases a correct answer alone will not score marks unless supported by working; these situations are made clear in the mark scheme. Examiners are prepared to award zero marks if the student's response is not worthy of credit according to the mark scheme.

## Question 1 (Total 3 marks)

| Part | Working or answer an examiner might <br> expect to see | Mark | Notes |
| :--- | :--- | :---: | :--- |
|  | $-4,-2,0,1,4$ | B1 | This mark is given for the correct list in <br> the correct order |

## Question 2 (Total 4 marks)

| Part | Working or answer an examiner might <br> expect to see | Mark | Notes |
| :---: | :--- | :---: | :--- |
| (a) | 9874 | B1 | This mark is given for the correct answer <br> only |
| (b) | 4798 | B1 | This mark is given for the correct answer <br> only |

## Question 3 (Total 4 marks)

| Part | Working or answer an examiner might <br> expect to see | Mark | Notes |
| :--- | :--- | :---: | :--- |
|  | 35 | B1 | This mark is given for the correct answer <br> only |

## Question 4 (Total 6 marks)

| Part | Working an or answer examiner might <br> expect to see | Mark | Notes |
| :--- | :--- | :---: | :--- |
|  | $0.2 \times 54 \quad$ or $\quad \frac{20}{100} \times 54$ | M1 | This mark is given for a <br> complete correct method to find $20 \%$ |
|  | 10.80 | A1 | This mark is given for the correct answer <br> only |

## Question 5 (Total 2 marks)

| Part | Working or answer an examiner might <br> expect to see | Mark | Notes |
| :---: | :--- | :---: | :--- |
| (a) | $\times$ at $(-2,-3)$ | B1 | This mark is given for the cross correctly <br> plotted |
| (b) | $(-1,2)$ | B1 | This mark is given for the correct answer <br> only |

Question 6 (Total 3 marks)

| Part | Working or answer an examiner might <br> expect to see | Mark | Notes |
| :--- | :--- | :---: | :--- |
|  | $32 p+8 p, 64 p+16 p, 96 p+24 p$, etc | P1 | This mark is given for a process to start to <br> find the combined cost of pens and <br> pencils |
|  | $£ 15 \div 40 \mathrm{p}=15 \div 0.4$ | P1 | This mark is given for a complete process <br> to find how many pens and pencils can be <br> bought |
|  | 37 | A1 | This mark is given for the correct answer <br> only, rounding 37.5 down to 37 |

## Question 7 (Total 5 marks)

Question 8 (Total 3 marks)

| Part | Working or answer an examiner might <br> expect to see | Mark | Notes |
| :---: | :--- | :---: | :--- |
| (a) | 11 th in a list of 21 heights is 165 | B1 | This mark is given for the correct answer <br> only |
| (b) | The median height of the boys $(165 \mathrm{~cm})$ is <br> greater than the median height of the girls <br> $(162 \mathrm{~cm})$ | C 1 | This mark is given for a correct statement <br> about the medians |
|  | The range of the boys' heights $(41 \mathrm{~cm})$ is <br> smaller than the range of the girls' heights <br> $(45 \mathrm{~cm})$ | C 1 | This mark is given for a correct statement <br> about the ranges <br> (NB: to get both marks at least one must <br> be interpreted in the context of the <br> question) |

## Question 9 (Total 3 marks)

| Part | Working or answer an examiner might <br> expect to see | Mark | Notes |
| :--- | :--- | :---: | :--- |
|  | Reliable Taxis: $1.5 \times 30=45$ | P1 | This mark is given for a process to <br> calculate the cost with one taxi firm |
|  | Speedy Taxis: $33+11.50=44.50$ <br> City Taxis: $37.50+8=45.50$ | P1 | This mark is given for a process to <br> calculate the cost with all three taxi firms |
|  | Speedy Taxis is the cheapest company to <br> use | C1 | This mark is given for a correct answer <br> supported by working |

## Question 10 (Total 2 marks)

## Question 11 (Total 4 marks)

| Part | Working or answer an examiner might <br> expect to see | Mark | Notes |
| :---: | :--- | :---: | :--- |
| (a) | $3 x+2 y$ | B1 | This mark is given for the correct answer <br> only |
| (b) | $2 p, 3 q$ | B1 | This mark is given for $2 p$ or $3 q$ |$|$|  | $2 p+3 q$ | B1 |
| :---: | :---: | :---: |
|  | $12 m-18$ | This mark is given for the correct answer <br> only |
| (d) | $7 f+6-6=27-6 ; 7 f=21$ | This mark is given for the correct answer <br> only |
|  | $f=3$ | A1 |
| This mark is given for an intention to <br> subtract 6 from both sides of the equation |  |  |

## Question 12 (Total 3 marks)

Part \begin{tabular}{l}
Working or answer an examiner might <br>
expect to see

 Mark 

Notes <br>
\hline (a)
\end{tabular}

## Question 13 (Total 3 marks)

| Part | Working an or answer examiner might <br> expect to see | Mark | Notes |
| :---: | :--- | :---: | :--- |
| (a) | $2,2,7,5$ | P1 | This mark is given for rounding one <br> dimension correctly |
|  | $(2 \times 2)+(7 \times 5)$ | P1 | This mark is given for a process to add <br> estimates of the areas of the two <br> rectangles |
|  | 39 | A1 | This mark is given for the correct answer <br> only |
|  | An underestimate, since all numbers have <br> been rounded down | C1 | This mark is given for a correct statement |

## Question 14 (Total 4 marks)

| Part | Working or answer an examiner might <br> expect to see | Mark | Notes |
| :--- | :--- | :---: | :--- |
|  | $80 \div 2=40$ so $40 \times 5$ <br> or <br> scale factor of 2.5, so $2.5 \times 80$ | M1 | This mark is given for a method to find <br> how many cakes were sold |
| 200 | A1 | This mark is given for the correct answer <br> only |  |

## Question 15 (Total 5 marks)

| Part | Working or answer an examiner might <br> expect to see | Mark | Notes |
| :--- | :--- | :---: | :--- |
|  | $5 x-147=2 x$ <br> or <br> $360-(116+5 x-147+2 x)$ | P1 | This mark is given for a process to start <br> solving the problem |
| $3 x=147$, so $x=49$ | P1 | This mark is given for a complete process <br> to solve the equation |  |
|  | Angles are $116^{\circ}, 98^{\circ}, 98^{\circ}$ and $48^{\circ}$ | P1 | This mark is given for a complete process <br> to find the size of the smallest angle |
|  | $48^{\circ}$ | This mark is given for the correct answer <br> only |  |

## Question 16 (Total 2 marks)

| Part | Working or answer an examiner might <br> expect to see | Mark | Notes |
| :--- | :--- | :---: | :--- |
|  | $10 \times 10 \times 10=1000$ <br> $4500 \div 1000$ | M1 | This mark is given for a method to <br> convert $\mathrm{mm}^{3}$ to $\mathrm{cm}^{3}$ |
|  | 4.5 | A1 | This mark is given for the correct answer <br> only |

## Question 17 (Total 3 marks)

| Part | Working or answer an examiner might <br> expect to see | Mark | Notes |
| :--- | :--- | :---: | :--- |
| $\frac{13}{5}-\frac{11}{6}$ M1 <br>  $\frac{78}{30}-\frac{55}{30}$ <br> $\frac{\text { This method mark is given for converting }}{\text { both expressions to improper fractions }}$  |  |  |  |
|  | M1 | This method mark is given for a correct <br> method to find a common denominator |  |

## Question 18 (Total 4 marks)

| Part | Working or answer an examiner might expect to see | Mark | Notes |
| :---: | :---: | :---: | :---: |
| (a)(i) | The starting price or a fixed charge | C1 | This communication mark is given for correct interpretation |
| (a)(ii) | The cost per minute or how much the price increases every minute | C1 | This communication mark is given for correct interpretation |
| (b) | $7.5 \div 5$ <br> or the $y$-intercept $=0.5$ | M1 | This method mark is given for an attempt to calculate the gradient, with 2 correct values used or for finding the $y$-intercept |
|  | $1.5 x+0.5$ | M1 | This method mark is given for a gradient given as a coefficient of $x$ in an equation |
|  | $y=1.5 x+0.5$ | A1 | This accuracy mark is given for the fully correct equation for the gradient |

Question 19 (Total 4 marks)

| Part | Working or answer an examiner might expect to see | Mark | Notes |
| :---: | :---: | :---: | :---: |
|  | $\sqrt{5^{2}-4^{2}}=3$  | P2 | Two process marks are given for dividing the shape into a rectangle and a triangle and finding the perpendicular height of the triangle <br> (One process mark is given for the expression $5^{2}-4^{2}$ being used) |
|  | $4 \times 8=32$ <br> or $\quad \frac{1}{2}(3 \times 8)=12$ or $2 \times \frac{1}{2}(3 \times 4)=12$ | P1 | This process mark is given for process to find the area of one of the two shapes formed |
|  | $32+12$ | P1 | This process mark is given for a complete process to find the total area of the shape ABCDE |
|  | $44\left(\mathrm{~cm}^{2}\right)$ | A1 | This accuracy mark is given for the correct answer only |

## Question 20 (Total 6 marks)

| Part | Working an or answer examiner might <br> expect to see | Mark | Notes |
| :--- | :--- | :---: | :--- |
|  | 0835 to $1105=2.5$ hours <br> $2.5 \times 110=275$ miles | P1 | This process mark is given for a process <br> to find distance from Manchester to <br> London |
|  | 0835 to $1135=3$ hours <br> $275+37=312 \mathrm{miles}$ <br> $312 \div 3=104 \mathrm{mph}$ | P1 | This process mark is given for a process <br> to find speed for Gill's journey from <br> Manchester to London |
|  | $110 \mathrm{mph}-104 \mathrm{mph}$ | P1 | This process mark is given for a complete <br> process to find difference in speeds |
|  | $6(\mathrm{mph})$ | This accuracy mark is given for the <br> correct answer only |  |

## Question 21 (Total 2 marks)

| Part | Working or answer an examiner might <br> expect to see | Mark | Notes |
| :---: | :--- | :---: | :--- |
| (a) | $600 \div 60=10,180 \div 30=6$ <br> or $6 \times 1.8=10.8,0.6 \times 0.3=0.18$ | P1 | This process mark is given for a process to <br> start to solve the problem |
|  | $10 \times 6=60 \quad$ or $10.8 \div 0.18=60$ | P1 | This process mark is given for a complete <br> process to find the total number of tiles |
|  | $\frac{3}{5} \times 60(=36)$ <br> $(60-36)=24$ tiles <br> 24 | P1 | This process mark in given for a process to <br> find out how many white tiles are needed |
|  | White $=36$, Green $=6: 18$ | Blue $=18$ | This process mark is given for a process to <br> find out how many green and blue tiles are <br> needed |
| (b) | Fewer tiles will be needed | This accuracy mark is given for the correct <br> answer only |  |

## Question 22 (Total 3 marks)

| Part | Working or answer an examiner might expect to see | Mark | Notes |
| :---: | :---: | :---: | :---: |
|  | $40 \mathrm{mph} \times 0.5$ hour ( $=20$ miles) or $x$-axis scaled correctly | M1 | This method mark is given for a method to find the distance to the hospital |
|  | 40 miles <br> or $y$-axis scaled correctly | M1 | This method mark is given for finding a total distance from home to the hospital |
|  | 40 miles at 32 mph takes 1.25 hours or a completed travel graph | A1 | This accuracy mark is given for finding the time of the journey home from the hospital <br> or for a fully a complete travel graph |
|  | Ria arrives home at 1645 | C1 | This communication mark is given for a correct conclusion |

Question 23 (Total 6 marks)

| Part | Working or answer an examiner might <br> expect to see | Mark | Notes |
| :--- | :--- | :---: | :--- |
|  | $0.455,0.465$ | B1 | This mark is given for 0.455 or 0.465 |
|  | $0.455 \leq y<0.465$ | B1 | This mark is given for the correct answer <br> only |

Question 24 (Total 4 marks) *******

| Part | Working or answer an examiner might <br> expect to see | Mark | Notes |
| :--- | :--- | :---: | :--- |
|  | $2,3,5$ | M1 | This mark is given for a method to for a <br> correct start to a factor tree (2 correct <br> branches $)$ |
|  | $2 \times 2 \times 2 \times 3 \times 3 \times 5$ | M1 | This mark is given for a fully correct tree <br> or correct factors as a list |
|  | $2^{3} \times 3^{2} \times 5$ | A1 | This mark is given for the correct answer <br> only |
