GCSE Mathematics (1MA1) - Foundation Tier Paper 2F
October 2016 mock paper mark scheme

## NOTES ON MARKING PRINCIPLES

## Guidance on the use of codes within this mark scheme

M1 - method mark. This mark is generally given for an appropriate method in the context of the question. This mark is given for showing your working and may be awarded even if working is incorrect.

P1 - process mark. This mark is generally given for setting up an appropriate process to find a solution in the context of the question.

A1 - accuracy mark. This mark is generally given for a correct answer following correct working.

B1 - working mark. This mark is usually given when working and the answer cannot easily be separated.

C1 - communication mark. This mark is given for explaining your answer or giving a conclusion in context supported by your working.

In some cases full marks can be given for a question or part of questions where no working is seen. However, it is wise to show working for one small slip could lead to all marks being lost if no working is shown.

Some questions (such as QWC) require all working to be shown; in such questions, no marks will be given for an answer with no working (even if it is a correct answer).

Note that in some cases a correct answer alone will not score marks unless supported by working; these situations are made clear in the mark scheme. Examiners are prepared to award zero marks if the student's response is not worthy of credit according to the mark scheme.

Question 1 (Total 1 mark)

| Part | Working or answer an examiner might <br> expect to see | Mark | Notes |
| :--- | :--- | :---: | :--- |
|  | $1.7 \times 1.7 \times 1.7=4.913$ | B1 | This mark is given for a correct answer <br> only |

## Question 2 (Total 1 mark)

| Part | Working or answer an examiner might <br> expect to see | Mark | Notes |
| :--- | :--- | :---: | :--- |
|  | $2: 3$ | B1 | This mark is given for a correct answer <br> only |

## Question 3 (Total 1 mark)

| Part | Working or answer an examiner might <br> expect to see | Mark | Notes |
| :--- | :--- | :---: | :--- |
|  |  | B1 | This mark is given for a chord correctly <br> drawn |
|  |  |  |  |

## Question 4 (Total 1 mark)

| Part | Working an or answer examiner might <br> expect to see |  |  |  |  |  |  |  | Mark | Notes |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |
|  |  |  |  |  |  |  |  |  |  |  |

Question 5 (Total 2 marks)

| Part | Working or answer an examiner might <br> expect to see | Mark | Notes |
| :--- | :--- | :---: | :--- |
|  |  | M1 | This mark is given for at least 3 correct <br> combinations |
|  | AB, AO, AP, BO, BP, OP | A1 | This mark is given for a fully correct lst <br> with no extras or permutations |

## Question 6 (Total 2 marks)

| Part | Working or answer an examiner might <br> expect to see | Mark | Notes |
| :---: | :--- | :---: | :--- |
| (a) | No, because: <br> numbers in the sequence are even and 603 <br> is not even <br> or <br> numbers in the sequence are multiples of 6 <br> and 603 is not a multiple of 6 <br> or <br> $6 n+12=603$ means $n$ is not an integer | C1 | This mark is given for a correct statement <br> with an explanation |
| (b) | 42 (or multiple of 42) is a term in the <br> sequence | B1 | This mark is given for a correct answer <br> only |

## Question 7 (Total 2 marks)

| Part | Working or answer an examiner might <br> expect to see | Mark | Notes |
| :--- | :--- | :---: | :--- |
|  | Shape A has 14 sides, shape B has 12 sides <br> or <br> Shape A has 4 missing edges, shape B has <br> 6 missing edges | P1 | This mark is given for a process to find <br> the total perimeter of both shapes |
|  | Shape A | A1 | This mark is given for a correct answer <br> with supporting working |

## Question 8 (Total 3 marks)

| Part | Working or answer an examiner might <br> expect to see | Mark | Notes |
| :--- | :--- | :---: | :--- |
| $8.5 \times 50000(=425000)$ M1 <br> $425000 \div 100$ <br> or <br> $425000 \div 1000$ <br> or <br> $425000 \div 100000$ This mark is given for a method using a <br> scale <br>  4.25 | This mark is given for a method to start a <br> conversion to from cm to km |  |  |

## Question 9 (Total 2 marks)

| Part | Working or answer an examiner might <br> expect to see | Mark | Notes |
| :--- | :--- | :---: | :--- |
|  | $146^{\circ}+32^{\circ}\left(=178^{\circ}\right)$ | M1 | This mark is given for using angles on a <br> straight line to add up to $180^{\circ}$ |
|  | Angles on a straight line add up to $180^{\circ}$ <br> and $178^{\circ} \neq 180^{\circ}$ | C1 | This mark is given for a full explanation |

## Question 10 (Total 3 marks)

| Part | Working or answer an examiner might <br> expect to see | Mark | Notes |
| :--- | :--- | :---: | :--- |
| $120 \div 8(=15)$ M1 <br> This mark is given for a method to find <br> the number of packs needed  <br>  $15 \times 4.35$ <br>  M1 <br> This mark is given for a method to find <br> the total cost  <br>  65.25 <br> A1 This mark is given for a correct answer <br> only l |  |  |  |

Question 11 (Total 3 marks)

| Part | Working or answer an examiner might <br> expect to see | Mark | Notes |
| :---: | :--- | :---: | :--- |
| (a) | 34 is not a multiple of 3 | C 1 | This mark is given for a correct statement |
| (b) | The order of operations is not correct | C 1 | This mark is given for a correct <br> explanation |
|  | The inverse of $\times 2$ is not used | C 1 | This mark is given for a correct <br> explanation |

## Question 12 (Total 3 marks)

| Part | Working or answer an examiner might <br> expect to see | Mark | Notes |
| :--- | :--- | :---: | :--- |
| $\sqrt{2} 2.7=1.6431677 \ldots$ <br> $\sqrt{2} 2.7+6.5=8.1431677 \ldots$ | M1 | This mark is given for a method to find <br> $1.643 \ldots$ or $8.143 \ldots$ |  |
|  | M1 | This mark is given for a method to find the <br> value of the expression |  |
|  | 2.18 | B1 | This mark is given for a correct answer <br> rounded to 2 decimal places |

## Question 13 (Total 3 marks)

| Part | Working an or answer examiner might <br> expect to see | Mark | Notes |
| :--- | :--- | :---: | :--- |
| $1.50+1.75+1.60=4.85$ P1 <br>  $4.85-3.99=$ <br> P1 This mark is given for a process to add <br> the price of any 3 items <br>  $£ 0.86$ or 86 p <br> This mark is given for a complete process  <br> to find the difference  |  |  |  |

## Question 14 (Total 3 marks)

| Part | Working or answer an examiner might <br> expect to see | Mark | Notes |
| :---: | :--- | :---: | :--- |
| (a) | $\frac{3}{8} \times 100(=37.5)$ <br> or <br> $\frac{27}{100}+\frac{3}{8}\left(=\frac{129}{200}\right)$ | M1 | This mark is given for a method to find a <br> common way to express the proportions |
|  | $100-27-37.5$ <br> or <br> $1-\frac{129}{200}=\frac{71}{200}$ | M1 | This mark is given for a method to find <br> the proportion of children at the match |
| 35.5 | A1 | This mark is given for a correct <br> percentage answer only |  |

## Question 15 (Total 6 marks)

| Part | Working or answer an examiner might <br> expect to see | Mark | Notes |
| :---: | :--- | :---: | :--- |
| (a) | $6 \div 1.5$ <br> or $1.5 \div 5$ and $1.5 \div 3$ | P1 | This mark is given for a process to find <br> the number of stones or attempts to draw <br> a repeat of the pattern |
|  | $(5+5) \times 4(=40)$ and $3 \times 4(=12)$ <br> or <br> $(10 \times 2.30)+(3 \times 3.65)$ | P1 | This mark is given for a complete process <br> to find total number of stones <br> or <br> to find the cost of 1.5 m of the path |
| $(40 \times 2.30)+(12 \times 3.65)$ <br> or <br> $4 \times[(10 \times 2.30)+(3 \times 3.65)]$ | P1 | This mark is given for a process to find <br> the total cost of the stones |  |
|  | 135.80 | A1 | This mark is given for a correct answer <br> only |
| (b) | $6 \times 4 \times 3.65(=87.60)$ <br> and <br> $135.80 \div 2(=67.90)$ | This mark is given for a method to find <br> costs of Harry's path and making a <br> comparison |  |
| No; $87.60>67.90$ | C1 | This mark is given for correct conclusion <br> supported by correct working |  |

## Question 16 (Total 3 marks)

| Part | Working or answer an examiner might <br> expect to see | Mark | Notes |
| :--- | :--- | :---: | :--- |
|  | $780-565=215$ | P1 | This mark is given for a process to find <br> the profit made in September |
|  | $\frac{13}{100} \times 215=27.95$ | P1 | This mark is given for a complete process <br> to find the extra profit made in October |
|  | No; $£ 27.95$ is less than $£ 30$ | C1 | This mark is given for a correct statement |

## Question 17 (Total 1 mark)

| Part | Working or answer an examiner might <br> expect to see | Mark | Notes |
| :--- | :--- | :---: | :--- |
|  | $\mathrm{x}=\frac{100}{5} ; x=20$ | B1 | This mark is given for a correct answer of <br> $x=20$ only |

## Question 18 (Total 2 marks)

| Part | Working or answer an examiner might <br> expect to see | Mark | Notes |
| :--- | :--- | :---: | :--- |
|  | Integer $>21$ | B1 | This mark is given for any integer greater <br> than 21 given |
|  | e.g. "answer" $>21$, "answer" $\div 21>1$ <br> "answer" $\div 6>3.5$ <br> Could be shown by conversion to decimals <br> with explanation | C1 | This mark is given for a correct <br> explanation |

## Question 19 (Total 3 marks)

| Part | Working or answer an examiner might <br> expect to see | Mark | Notes |
| :--- | :--- | :---: | :--- |
| $\frac{32}{100} \times 675(=216)$ or $100-32(=68)$ M1This mark is given for a method to find <br> $32 \%$ of 675 |  |  |  |
|  | M1 | This mark is given for a method to find <br> the price of the television in the sale |  |
|  | A1 | This mark is given for a correct answer <br> only |  |

Question 20 (Total 3 marks)

| Part | Working an or answer examiner might <br> expect to see | Mark | Notes |
| :--- | :--- | :---: | :--- |
|  | $25,75,75$ <br> or <br> $25+75+75(=175)$ <br> or <br> $\frac{1}{4}+\frac{3}{4}+\frac{3}{4}\left(=1 \frac{3}{4}\right)$ <br> or <br> ratio e.g. $3: 3: 1$ | P1 | This mark is given for a process to start <br> solving the problem |
|  | $25 \div 175$ <br> or <br> $\frac{1}{4} \div 1 \frac{3}{4}$ | P1 | This mark is given for a complete process |
|  | $\frac{1}{7}$ | A1 | This mark is given for a correct answer <br> only |

## Question 21 (Total 4 marks)

| Part | Working or answer an examiner might <br> expect to see | Mark | Notes |
| :---: | :--- | :---: | :--- |
| (a) | $\frac{177}{360} \times 240(=118)$ | P1 | This mark is given for a process to find <br> the total number of girls in Year 7 |
|  | P1 | This mark is given for a process to <br> process for total students in Year 8 |  |
|  | $\frac{118+8}{216} \times 360$ | P1 | This mark is given for a complete method <br> to find the angle for Year 8 girls |
|  | A1 | This mark is given for a correct answer <br> only |  |

## Question 22 (Total 4 marks)

| Part | Working or answer an examiner might expect to see | Mark | Notes |
| :---: | :---: | :---: | :---: |
| (a) |  | M1 | This mark is given for a line of the correct length line or one correct end and line |
|  | - 0 <br> -2 3 | A1 | This mark is given for a correct answer only |
| (b) | $5 n>24$ <br> or $\frac{5 n+3}{5}>\frac{27}{5}$ | M1 | This mark is given for a first step of a method to solve the inequality |
|  | $n>4.8$ | A1 | This mark is given for a correct answer only |

## Question 23 (Total 4 marks)

| Part | Working or answer an examiner might <br> expect to see | Mark | Notes |
| :---: | :--- | :--- | :--- |
| (a) | B1 | This mark is given for 13 and 20 in the <br> correct positions in the Venn diagram |  |
|  | $43-20(=23)$ <br> $60-43-13(=4)$ | M1 | This mark is given for a method to find <br> the number of students who study only <br> Spanish, or the number of students who <br> study neither French nor Spanish, |
|  | A1 | This mark is given for a fully correct <br> Venn diagram |  |
| (b) | $\frac{4}{60}$ | B1 | This mark is given for $\frac{4}{60}$ |

Question 24 (Total 2 marks)

| Part | Working or answer an examiner might <br> expect to see | Mark | Notes |
| :--- | :--- | :---: | :--- |
|  | Rotation, $90^{\circ}$ anti-clockwise (or $270^{\circ}$ <br> clockwise, centre $(0,-1)$ | M1 | This mark is given for seeing one of these <br> terms used. |
|  | Rotation $90^{\circ}$ anti-clockwise with centre <br> $(0,-1)$ | A1 | This mark is given for the correct answer <br> only |

## Question 25 (Total 4 marks)

| Part | Working or answer an examiner might <br> expect to see | Mark | Notes |
| :---: | :--- | :---: | :--- |
| (a) | e.g. rain, school day, measurement error | C1 | This mark is given for a correct reason for <br> low attendance in hot weather |
| (b) | Positive | B1 | This mark is given for the correct answer <br> only |
| (c) | B1 | This mark is given for answer in range <br> $15-25$ |  |
| (d) | e.g. data out of range, number of children <br> will be negative | C1 | This mark is given for a correct <br> explanation of why it would not be <br> sensible to use the scatter graph |

Question 26 (Total 5 marks)

| Part | Working an or answer examiner might expect to see | Mark | Notes |
| :---: | :---: | :---: | :---: |
|  | $F E=(28-6-6) \div 2(=8)$ <br> or $A B=(28-6-6-3-3) \div 2(=5)$ | P1 | This mark is given for a process to process to find the distance $F E$ or $A B$ |
|  | $\begin{aligned} & A F E=\frac{4 \times 8}{2}(=16) \\ & C D E=\frac{6 \times 3}{2}(=9) \\ & \frac{5 \times 4}{2}(=10) \\ & \frac{2 \times 3}{2}(=3) \end{aligned}$ | P1 | This mark is given for a process to process to find area of a triangle in the diagram |
|  | $\begin{aligned} & 8 \times 4+2 \times 3-(16+9) \\ & \text { or } \frac{5 \times 4}{2}+\frac{2 \times 3}{2} \\ & \text { or }(6 \times 8)-(5 \times 2)-(16+9) \end{aligned}$ | P1 | This mark is given for a process to complete process for shaded area |
|  | 13 | A1 | This mark is given for the correct answer only |
|  | $\mathrm{m}^{2}$ | C1 | This mark is given independently for stating the correct units |

## Question 27 (Total 3 marks)

| Part | Working or answer an examiner might <br> expect to see | Mark | Notes |
| :--- | :--- | :---: | :--- |
| $4 x+\quad y=10$ <br> or <br> $2 x-20 y=52$ <br> $20 x+5 y=-42$ <br> $x-5 y=13$ <br> $21 x=\quad 63$ | M1 | This mark is given for a method to correct <br> process to eliminate one variable (allowing <br> one arithmetic error) |  |
|  | $4 x-2=10$ or $x+10=13$ <br> or <br> $12+y=10$ or $3-5 y=13$ | M1 | This mark is given for a method for <br> substituting the found value in one of the <br> equations or an appropriate method after <br> starting again |
|  | $x=3, y=-2$ | A1 | This mark is given for the correct answer <br> only |

## Question 28 (Total 4 marks)

Question 29 (Total 2 marks)

| Part | Working or answer an examiner might <br> expect to see | Mark | Notes |
| :--- | :--- | :---: | :--- |
|  | $350 \times 1.02 \times 1.02 \times 1.02$ <br> or <br> $350 \times 1.02^{3}$ | M1 | This mark is given for a method to find an <br> increase of 2\% for three years |
|  | 371.42 | A1 | This mark is given for a correct answer <br> only |
