### Description

Pupils will have experienced a range of activities that will facilitate the skills, knowledge and understanding of the skills, tactics and techniques of those sports. Activities such as invasion games, (netball, rugby, basketball and football) are covered, through which problem solving and thinking skills are developed.

They will understand the principles of warming up and also develop their leadership skills through leading warm ups and supporting and encouraging their peers through feedback. They will also be able to evaluate their own performance and that of others, using their knowledge of the skills, techniques and tactics. They will also have covered a creative component of the curriculum such as dance or gymnastics. During the summer term we cover athletics, striking and fielding games which includes cricket, rounders and softball.
